Desmo sil

Silicone based nonstick releasing agent

DESCRIPTION

Desmo sil is an active silicone based nonstick releasing agent. It forms a thin and uniform film which avoids adherence ensuring perfect working conditions. Useful for demolding processes of rubber and plastics and also to avoid adherence of projections from welding processes. Desmo sil is also useful as a general purpose nonstick.

DOSAGE AND USE INSTRUCTIONS

Mold release: spray lightly the interior parts of the mold at a distance of aprox. 30 cm. Leave it for a while before starting molding.

Welding: spray all the parts exposed to projections but away from the arc, especially nozzles, contact tubes (just outside), diffusers, bottom of the nozzle holder, etc. Leave it for a while before starting welding. After the treatment, a light tap is enough to make the projections fall off.
