Iod Pv

Aseptic liquid product for pre- and post-milking teat treatment.

DESCRIPTION

A liquid aseptic product specially designed for pre- and post-milking teat treatment. Formulated with povidone iodine and emollients, this product offers effective protection against dirt and microorganisms, preventing infections and ensuring animal health and welfare. Its application is simple and efficient. It is applied directly to the teats, either by spraying or dipping. It is important to ensure that the teats are completely dry before milking. With its high quality formula, it provides effective protection against harmful micro-organisms, ensuring proper hygiene during the milking process.

It has a brown liquid appearance, and its pH makes it a mild and non-aggressive product for sensitive animal skin. Its main components include povidone iodine, known for its antiseptic properties, and emollients that help to keep the teat skin in optimal condition.

It comes in 20kg packs, ensuring an adequate supply for pre- and post-milking treatment in different establishments. With its proven effectiveness and focus on infection prevention, Iod Pv is the ideal choice for those looking for a quality teat care product and animal health protection.

DOSAGE AND USE INSTRUCTIONS

It is applied pure on the nipples, by spraying or immersion. Dry the nipples completely before milking.
